

Environmental Policy Statement

Pipeline & Drainage Systems Ltd based in Attercliffe & Darnall, Sheffield, have become a market leader in bridge drainage and a growing force in kerb drainage and channel drainage around the UK and beyond.

We are one of the UK's leading drainage pipe and systems specialists and offer a complete drainage solution for projects from the initial design and specification through to supply and installation.

Like all industries, PDS recognise that we have an impact on the environment.

We strive to create a company culture in order to manage our significant environmental aspects through the following commitments:

- Comply as a minimum, with all applicable environmental legislation and other requirements
- Implement measures in order to prevent pollution from our activities, products and services
- Set environmental objectives and targets to continually improve environmental performance
- Apply appropriate measures with the aim to reduce unnecessary consumption of resources such as energy, water and materials
- Manage controlled waste and effluent with due care and aim to reduce unnecessary production of these outputs

Policy Review: This Policy will be reviewed annually and amended as necessary.

This environmental policy is communicated to all staff working for, or on behalf of, Pipeline and Drainage and is available to the public via the website.

Date: 2nd April 2014
