

Hydrodeck

SELECTION OF HYDRODECK PROJECTS SUPPLIED

This is as accurate as possible representation of our success since the launch of the HYDRODECK system.

We are involved in the early design of a number of structures requiring continuous kerb drainage systems, which are both new build and refurbishment contracts.

Our experience in bridge drainage systems covers nearly 8 years, during which time our personnel have supplied to over 500no. structures.

This experience and industry feedback has resulted in the development of the HYDRODECK range of bridge drainage and our Contracts Supplied list continues to grow.

UNITED KINGDOM

A20 VIADUCT, DOVER

DETAILS - 200mtrs Hydrodeck Drainage

CONTRACTOR - Hanson

CLIENT -  **HIGHWAYS**
AGENCY

CONSULTANT - W S Atkins
